ACKNOWLEDGEMENT

It is our privilege and duty to acknowledge the kind help and guidance received from several people in preparation of this report. It would not have been possible to prepare this report in this form without their valuable help, cooperation and guidance.

First and foremost, we wish to record our sincere gratitude to the Management of this institute and to our beloved Professor, **Dr. B. R. Patagundi** Principal, S. G. Balekundri Institute of Technology, Belagavi for his constant support and encouragement in preparation of this report and for making libraries available and laboratory facilities needed to prepare the report.

Our sincere thanks are also to **Dr. B. S. Halakarnimath** Head, Department of Computer Science and Engineering, S.G.B.I.T, Belagavi, for valuable suggestions and guidance throughout the period of the report.

We express our sincere gratitude to our beloved guide/Course Coordinator, **Ms. Kangana W. M.**, Asst. Prof., Department of Computer Science and Engineering, S.G.B.I.T, Belagavi, for guiding us in investigations for this project and in carrying out analytical/experimental work. Our numerous discussions with her were extremely helpful. We hold her in esteem for guidance, encouragement and inspiration received from her.

We would also like to extend our heartfelt gratitude to the entire Department of Computer Science and Engineering, S.G.B.I.T, Belagavi, for their continuous support throughout the project which would otherwise be impossible.

Last but not the least, we wish to thank our parents for financing our studies in this college as well as for constantly encouraging us to learn engineering. Their personal sacrifice in providing us this opportunity to learn engineering is gratefully acknowledged.

Belagavi   **Vishant Patil**   **(2BU19CS056)**
Date: **Swapnil Chimanapago (2BU19CS408)**

ABSTRACT

Computer Graphics has grown into a very important topic in the branch of Computer Science. This is due to an effective and rapid communication formed between man and the machine. Human eye can absorb the information in a displayed diagram or perspective diagram much faster than it can scan a page or a table of contents.

The Rubik's Cube is a well known puzzle that has remarkable group theory properties. The objective of this project is to understand how the Rubik's Cube operates as a group and explicitly construct the Rubik's Cube Group.
